

Heat sealed button security

BSS MK13

BSS MK8

Ascolite® is the unique button security system worldwide since 1972. The Ascolite® system consists of the highly elastic and heat-sealable Ascolite® TF-yarn and the Ascolite® BSS wrapping machines, developed in Switzerland specially for button-shank wrapping.

ASCOLITE® BSS WRAPPING MACHINES
SWISS ENGINEERING MADE IN EUROPE

We can offer you two types:

The semiautomatic Mark 8 and the fully automatic Mark 13. The semiautomatic Mk8 is very suitable for smaller productions; the fully automatic Mark 13 with its new integrated thread tensioner is highly suitable for high performance productions, thanks to its extremely short wrapping time of less than 1 second.

ASCOLITE® TF-YARN
SWISS MADE

Ascolite® TF (TF = thermofusion) yarn is specially designed for button shank wrapping with securing effect. Its unique elastomeric gripping force and the heat sealing are the keys to button loss prevention as our yarn permanently squeezes the attaching threads and holds them fast. The button is properly secured. The slim and tail-free button shank has a clean finish and lets the button holes close without bulging.

BSS Mk13 button shank wrapping machine

NEW GENERATION 2014

5000 Button shanks per cone

Mk13 wraps and secures any type of sewn button at high speed and with constant precision. The 360 ° bonding from all sides guarantees the highest possible button security. The economical consumption of TF-yarn and the electronic controlled process make Mk13 ideally suited for all large volume producers. Mk13 has 3 presetable programs, enabling fast switching between different button shank types, including special setting for long shanks and blazer type buttons.

BSS Mk13 specifications

Performance data

Number of buttons, that can be wrapped with 1 cone of 20g	3500-5000
Buttons per hour	1200
Handling steps	1
Heat seal coverage	all around
Fine adjustment of wraps	☺
Preset adjustable programs	3
Controls	touch screen menu
Button holder	☺
Electric supply	110/250V single phase

BSS Mk8 button shank wrapping machine

2500 Button shanks per cone

Our world-wide best-seller and standard factory model for small to medium size productions. Wraps the button shank of all kinds of garments such as men's-, ladies-, outerwear and uniforms. The Mk8 has a convenient control display and a built in seal control system. The heating fork is positioned upside down to make bonding much easier. Optical and sonical indicators signal the optimal seal time.

0986	1011	0057	7007
5191	0441	1507	

The colours printed above don't match our original colour shades a 100%.

Ascolite® TF is characterized by

Strong heat-sealing layer

- Bonds wrapping threads together
- Eliminates loose ends and tails
- Prevents loosening during use

Coloured component

- Increases overall strength
- washing and dry cleaning proof
- 47 colours, more available on request

Flexible Elastane core

- High flexibility
- Unmatched grip
- Resistant to washing fatigue
- High tenacity and tensile strength
- 350% elasticity
