# The CoverPro™ 1000CPX

## Industrial-Style Cover Stitch Machine

When professionals in the fashion industry finish a garment, they don't just hem it on a sewing machine. They use a cover hem stitch. Now you can achieve the same professional finish with the CoverPro™ 1000CPX from Janome. It gives you the perfection of an industrial model with the ease-of-use of a home sewing machine. And, you'll never have to worry about converting from regular serging to a cover or chain stitch again!

The 1000CPX is a three-needle, four-thread model capable of producing:

- Wide 6mm triple-needle cover stitch
- Wide 6mm double-needle cover stitch
- Narrow 3mm double-needle cover stitch
- Chain stitch

It has the features and power necessary to finish a huge range of sewing jobs and is the perfect companion machine to your Janome serger.

You'll find innovative features like the Seam Tightening System™ (STS), which creates a tighter, sturdier stitch on a wide range of fabrics. The 1000CPX also offers a convenient free arm configuration, so you can easily finish hard-to-reach seams.

The CoverPro™ 1000CPX is simply the industry's most innovative and easiest to use. And because it's a Janome, you can be sure the quality and reliability are unsurpassed.

**EXTRA LARGE BED SPACE WITH EASY ACCESS**  
The largest sewing space available anywhere: 4" x 5.5" (100mm x 143mm). Such generous space means you can actually make a cover stitch in the middle of a garment.

**VERTICAL NEEDLE DROP**  
The same familiar vertical needle action of a sewing machine allows improved stitching. Extra space around the mechanism makes switching out needles fast and easy. The presser foot lifter is also easier to reach than on a serger.

**GREATER VARIABLE STITCH LENGTH AND DIFFERENTIAL FEED**  
The CoverPro™ 1000CPX leads the competition in stitch length control (1mm-4mm) and differential feed ratio (0.5-2.25).

**FREE ARM CONFIGURATION**  
Finish sleeves, cuffs, waistbands and other hard-to-reach seams faster and with better handling.

**ONE-HAND THREAD CUTTER**  
Just like a sewing machine, you can clip your thread tails in one easy motion.

**SUPERIOR NEEDLE SYSTEM**  
Uses the Schmetz ELX705 needle system. Like industrial needles, this special needle has a long groove front and back. It's more reliable than the HAX1SP needle used in most competitive models.

### The Easiest Threading System You've Ever Seen

Upper needle threading is color coded, easy to see, and smooth. But it's the lower looper that will really make you smile. It's the easiest ever! Simply pull the thread through, push the looper closed, and you're ready to stitch. The handy needle threader is included.

### Seam Tightening System™ (STS)

Janome's exclusive Seam Tightening System™ employs a spring instead of the looper thread tension dial to reduce slack in the looper thread. This allows for a tight, flat, and sturdy stitch on thick fabrics, and a looser stitch on fabrics that require more flexibility.

### Quick Reference Chart

Located on the front of the machine for easy access, this full color reference guide helps you adjust for a soft or tighter stitch without consulting the manual. The chart clearly displays available stitches, and shows the tension settings for both soft and tighter seams. A color-coded threading chart located in the looper area means guess-free and super quick threading.

### Perfect For Activewear

Fitness, dance, skate, and gymnastics outfits are perfect projects for a CoverPro™ 1000CPX. Apply elastic within a casing with a beautifully professional finish – all in one pass. Save money and boost the creativity of activewear creations.
